GEE13 READING AND VISUAL ARTS

- 1. I want you to pick any of the art from the art movement artworks and explain how it affects you.**

To me, '**Time Transfixed**' deeply affects me; it feels like I have a lot of potential, but I'm stuck and can't move forward. The train, which should be speeding ahead, is frozen in a strange place, just like when I feel ready to make progress, but something stops me. It's like I'm full of energy and ideas, but invisible barriers keep me from moving, leaving me trapped in a moment when I know I should be going forward.

- 2. Which art movement do you think still exist today? (give examples)**

I think minimalism is the most alive today. influencing everything from visual arts to architecture and fashion. I often find minimalism in digital design, where websites and apps prioritize simplicity to enhance user experience.

- 3. Why do you think these arts are important?**

Art is important because it helps us express our feelings, share stories, and understand different cultures. Art also brings colors to our life and create connection between peoples. It can serve as a powerful tool for healing, helping individuals cope with challenges and find solace.
